

Kit #'s 5000, 5001, 5009,
5010 & 5021

Decal Placement

Place Trailmobile D3 logo at location (A) both sides this is on the frame of the trailer below the rub rails. Place Trailmobile logo D1 center at location F and Trailmobile logo D 2 Trailmobile logo on both mudflaps location (B). Depicting 1997's era + you can add conspicuity stripes D6 on the rub rails the red edge goes to the rear. The small stripe D7 goes on the rear bumper. Since these kits are generic builds you have several optional decals such as D4 which is a corner load marker sometimes found on the inside of the bulkhead upper L-R side location area E, trailer numbers D5 in both white and black which you can place where you see fit.

D1		D4		D5		
D2				T10234015678910T		
D3				T10234015678910T		
				T10234015678910T		
D6						
D7						

Lonestar Models Item #12041

Optional Trailer Parts

As the trailers in this series are generic there is no specific direction for the optional trailer parts included in the kit. Please review the assembly instructions as you will be able to choose from two bulkhead options, a version without a bulkhead, (2) landing gear feet either round or flat, optional tool box, spare tire rack and a variety of placards that can be fitted to the bulkheads to place your own graphics to custom decorate your trailer.
